

Mitered Borders

1. Place tool (with hole) on corner. Mark with pencil.
2. Sew borders on, just to dot, but leaving an equal amount of border at each end.
3. Lay hanging face down and overlap ends so they are square.
4. Draw a line from dot to where ends cross.
5. Fold center of hanging in half, diagonally, right sides together. Match edges of border and pin on line. Sew on line, making sure you sew right up to center corner.
6. Press and trim seam.
